12% TAX BUY/SELL/TRANSFER

- 4% MARKETING WALLET
- 3% BURN PARTY WALLET
- 3% \$DBT REFLECTIONS
- 1% AUTO LP
- 1% DBT STAKING POOLS

OBJECTIVE

The Disco Burn Token is a hyper-deflationary token in the Binance Smart Chain that buys and burns other cryptocurrency tokens. We expose our investors to safe, vetted projects and have projects compete to win the opportunity to have DBT buy and burn their tokens raising their floor price permanently. Winners are selected by DBT holders voting on the blockchain.

3% of every transaction (Buy, Sell, & Transfer) goes to the DBT Burn Party wallet in the form of BNB. WE hold a competition every month for projects that want to win 75% of the total amount in the burn wallet. All other finalists win a 5% buy and burn. The winners receive a live streamed buy and burn of their projects token. DBT holders who hold a minimum of \$5 of DBT earn an airdropped vote token. Voters cast their vote for their favorite project by send their vote token to the corresponding wallet assigned to their project of choice to win.

Every month the DBT community sets the stage for competitors to come in and market their project with the intention to win the community's vote. It is our way of showing the cryptocurrency space some much needed love.
